<p style="text-align:center">CALL FOR PAPERS</p>
<p style="text-align:center">22nd International Input-Output Conference</p>
<p style="text-align:center">15th – 18th July, 2014, Lisbon, Portugal</p>
<p style="text-align:center">[14th July, Fourth Edition of the International School of Input-Output Analysis (ISIOA)].</p>
<p style="text-align:center">http://www.iioa.org/conferences/22nd/</p>

The International Input-Output Association (IIOA) and the Research Unit on Complexity and Economics (UECE), announces that the 22nd International Input-Output Conference will be held on **15th – 18th July, 2014,** at the School of Economics and Management (ISEG) of the University of Lisbon**, Lisbon, Portugal**.

Goal of the conference

The goal of the conference is to promote and stimulate the worldwide exchange of ideas among economists between them and government officials, policy makers, engineers, statisticians and managers with interests in input-output analysis and related methods.

Mode of Participation

Planned/Organized Sessions

At past International Input-Output Conferences, pre-planned sessions organized by attendees have been most successful in terms of the number of attendance and participant interaction. For this reason, we strongly encourage proposals for sets of thematic sessions. In proposing such sessions or sets of sessions, as soon as is possible please send the Chair of the Scientific Program Committee an e-mail including the name(s) of the organizer(s), an abstract describing the theme/objectives for the session(s), names and institutional affiliations of the session chair(s) and presenters as well as an abstract for each paper to be included in the session.

Individual submissions

The majority of papers at International I-O Conferences tend to be submitted this way. We ask that author(s) submit their names, institutional affiliation(s), the paper title and an abstract of the presentation (of not more than 300 but not less than 200 words) and select a topic from the list provided. Abstracts are reviewed by members of the scientific committee before they can be accepted for inclusion in the conference program. An author is permitted to *present* a maximum of two papers at the conference but can of course be a co-author of a number of submitted papers.

Submission of abstracts

Please submit abstracts for papers before **January 24, 2014** through the new online abstract submission system COPASS: **http://copass.iioa.org**. Please, fill in the requested data (title, abstract, names of all authors, e-mail address, preferred day of presentation, etc.) and select an appropriate topic for the abstract. The length of the abstract should not exceed the maximum allowed by the system.

Submission of full papers

A paper with more than **2,000 words** shall be considered a full paper for the submission. The full paper should be sent in PDF format using **http://copass.iioa.org**. To secure a spot on the final program please submit a completed electronic version of the paper not later than **May 9, 2014**.

Travel Grants

The IIOA has limited funds to encourage **young experts from non-OECD member countries** to attend the conference. As many as ten awards in amounts of up to US $2,500 each are available. Applicants must be IIOA members born after 1973. They must also present an unpublished paper and have not received travel grants in any of the three previous International I-O Conferences. The Travel Grant Committee of the IIOA will verify applicant qualifications and bestow the award to those qualified applicants with the most promising papers. Authors who wish to apply for a travel grant should submit their **full paper** to the Chair of the Scientific Program Committee and the Chair of the Local Organizing Committee by **March 14, 2014**.

Leontief Memorial Prize

The IIOA is pleased to announce a Leontief Memorial Prize 2014 for the **best conference paper of young authors** (born after 1973, unpublished work, work combining theory and application) of the forthcoming International Input-Output Conference in Lisbon. All co-authors must meet the "young author" requirements. The Leontief Memorial Prize Committee of the IIOA will verify applicant qualifications and select the winning paper, which will be published in *Economic Systems Research*. Authors who want to compete for the 2014 Leontief Memorial Prize should submit their **full paper** to the Chair of the Scientific Program Committee and the Chair of the Local Organizing Committee by **March 14, 2014**.

Program and book of abstracts

The final program and the book of abstracts will include only papers for which at least one author has registered the conference **and sent the full paper (of at least 2,000 words) by May 9, 2014**. After this date, only co-authors of already registered and accepted papers and other participants without presentations will be allowed to register. Please, be aware that conference fees are not be reimbursed if any author decides not to attend. Authors with an accepted abstract that have not registered for the conference until June 30.2014, must face the possibility to be removed from the final program in order to minimize the number of cancellations of presentations.

Topics

1. Development of Input-Output Benchmark Accounts and Statistics

2. Approaches for Developing Satellite Accounts (tourism, sports, and environment)

3. Development of International Input-Output and Supply-Use models

4. Estimating Annual, Regional, and Multiregional Input-Output Accounts

5. World Input-Output Modeling and Related Databases

6. Estimating, Measuring, and Balancing International Trade

7. Analysis of Vertical Specialization and Outsourcing

8. Analysis of Productivity and Efficiency

9. Investigations into Economic Structural Change and Dynamics

10. Systems Econometric Time-Series Modeling

11. Computable General Equilibrium Modeling and Social Accounting Matrices

12. Conjoined Modeling Approaches using Input-Output Tables

13. Life-cycle Assessment using Input-Output Tables

14. Industrial Ecology using Physical and Monetary Input-Output Tables

15. Environmental Input-Output Modeling

16. Energy Input-Output Modeling

17. Transportation Input-Output Modeling

18. Analysis of Sustainable Production and Consumption

19. Physical and Hybrid Input-Output Tables

20. Examinations of the Input-Output Price Model

21. Dynamic Input-Output Modeling and Analyses of Capital Formation

22. Investigations into Classical Input-Output Applications

23. Cross-National Investigations of Industrial Economics

24. Representations/Analyses of the Firm in an Input-Output Context

25. Extensions in Multiplier and Linkage Analysis

26. Techniques for Identifying Important I-O Coefficients and Sectors

27. Mathematical Treatments of Input-Output Relationships

28. Examinations of Mathematical Properties of Input-Output Tables

29. Relating Input-Output Techniques and Network Theory

30. Impact Analysis of Disaster Scenarios

31. Input-Output-based Policy Analysis

OVERVIEW OF IMPORTANT DATES:

Submission of abstracts (by means of **http://copass.iioa.org**)	**January 24, 2014**
Call for convened sessions	**March 14, 2014**
Open registration	**February 17, 2014**
Notification of acceptance	**March 01, 2014**

Submission for the Leontief Memorial Prize (full paper)	**March 14, 2014**
Travel grants application	**March 14, 2014**
Early registration ends	**April 15, 2014**
Submission of full papers (by means of http://copass.iioa.org)	**May 9, 2014**
Registration closes	**June 30, 2014**
Fourth Edition of the International School of Input-Output Analysis (ISIOA)	**July 14, 2014**
Conference	**July 15-18, 2014**

Chair of the Local Organizing Committee:

Susana Santos

Universidade de Lisboa, ISEG-UECE
