Special Session (SS19) on:
Globalization and Regional Science

Organiser:

Manas Chatterji - Professor of Management, Binghamton University; Guest Professor, Peking University, China. E-mail: mchatterji@binghamton.edu

The aim and scope of the special session:

In this session, we are interested in the process of globalization in historical perspective. We shall start with some analytical tools. Then we discuss the trend of production, trade and investment globally, the role of technology and multinational corporations in globalization and economic restructuring. Regional, agricultural, and environmental impacts of globalization will be investigated. Globalization and security is another subject of interest in this session. Topics like NAFTA, European Union and Asian Pacific economy will be related to globalization.

Historically, the methods and techniques of Regional Science were developed for a nation and its constituent regions, but it is time that we link Regional Science with international economics, finance, marketing, trade, technological revolution, multinational corporation, existence of Big Data, etc. in a globalized world.
