## Welcome to the 13th World Congress of the RSAI

Dear Friends and Colleagues,

It is our pleasure to welcome you to the 2021 RSAI World Conference! On behalf of the Regional Science Association International, the Local Organizing Committee, and the Scientific Committee, we would like to thank you for joining us at this historical meeting, and for sharing your experience, research and views with all the participants.

Organized by the Moroccan Section of the RSAI, the 2021 RSAI World Conference is intended to be a major international forum for researchers and policy-makers in the field of Regional Science across the world, focusing on today's most challenging issues. The World Conference brings together more than 500 participants from 53 different countries. The papers cover all major areas of the field, with applications for a wide range of regions in the globe.

Since we have decided that the congress would run 100% online, many colleagues from the Association have joined us in an extraordinary effort to organize a high standard, inclusive, online event. Recognizing the key role played by former RSAI President, Mark Partridge, we would like to extend our sincere gratitude and appreciation for the hard work and dedication provided by all of them.

Going online has shown to bring us some opportunities. We have contacted every single national section and invited them to propose special sessions dedicated to their countries/regions. We have received positive responses from almost all sections. This is really invigorating and motivating, further developing the sense of community belongingness that may motivate a larger number of young regional scientists to engage more broadly in the Association. We now have the opportunity to have a truly global conference, with the participation of many of RSAI sections!

This World Conference is a unique opportunity to showcase some of the exceptional work regional scientists are doing all over the world. There are 35 slots dedicated to 25 national sections, in addition to an even larger number of parallel sessions, and five outstanding keynote speakers.

Going online also made possible a wider participation across the world, allowing us to minimize the number of competing sessions, to allocate time slots with time zones in mind, and to reduce drastically registration fees.

We are pleased you were able to join us, and we wish you an excellent and memorable conference! Your participation and commitment to RSAI are very important and truly appreciated. In the next days, you will all have the opportunity to grab a big picture of our Association, being exposed to different topics and approaches people are using across the world.

Please receive our warmest welcome!

## A truly World Congress

On behalf of the Moroccan Regional Science Association (AMSR) and the Regional Science Association International (RSAI), it is our pleasure to welcome you all to the 13th World Congress of the RSAI.

This last year has brought well known troubles to the whole world. At the time we are writing these words, the worst pandemic in over a century is still exerting a major toll on our every lives, among which the need to resort to online scientific events such as the one we are joining between May 25 and 28, 2021.

Yet, the RSAI took this as an opportunity to further broaden the geographical and disciplinary scope of our main global gathering. The map below shows the broad coverage of participants in this RSAI World Congress, as evidenced by the 53 Countries included in the program (proxied by Country of the institution of affiliation of the first author).

While older supranational sections (NARSC and ERSA) are as usual largely represented, we are very happy to report an important presence of PRSCO and LARSA national sections, too. Moreover, and this is among the main goals of this edition of the World Congress, we witnessed a positive feedback from many regional scientists located in African Countries where no national section of the RSAI is to date present. We hope this congress will sow seeds for the creation of new national sections, with the fundamental help of AMSR, presently the only national section active on the Continent. In the medium run, hopefully a new supranational section will emerge, including all such new sections, while also coordinating their activities.

**Papers accepted to the 2021 RSAI World Congress**

The RSAI World Congress is also a place of strong networking. In the next map, the intensity of co-participation for authors presenting papers accepted to regular sessions of the congress is represented with blue lines, with increasing thickness showing more frequent interactions of presenters sharing the same sessions. Blue lines cross all oceans and suggest a high propensity of exchange of ideas among regional scientists all over the world.

The last map shows with green lines that an analogous message comes from interaction of authors presenting papers accepted in special sessions during the World Conference. The geography of interactions appears relatively different, with thicker lines connecting North America and Europe, and between China and South Asia.

Beyond the pre-existing networks, we wish this Congress to be an opportunity for all of you (us!) to open new nodes, and further diffuse our discipline.

Have a safe, interesting, and productive Congress!

The RSAI World Congress Organizing Committee

## Instructions to Chairs, Presenters, and Discussants

1. Sessions are will last 1 hour and 15 minutes. Please stick to the times shown in the program. Each presentation is assigned a specific time, all expressed in the GMT+1 zone (please be sure and check how this translates into your own time zone). If you have a no-show, use the time for a discussion of the proceeding paper(s) or for a recess. Please do not shift papers to fill voids, as individuals may want to attend a particular paper.
2. The majority of sessions have 3 papers. In 3 paper sessions, each presenter is allowed 18 minutes for presentation, followed by a 5 minutes discussion. In 4 papers session, each presenter is allocated 15 minutes, followed by 3 minutes discussion. In the few 5 paper sessions, each paper should be allocated 12 minutes, with about 10 minutes at the end of the session for generic questions.
3. Hold each individual to the time available. If a speaker continues after time has expired, please let her/him know that time has expired. The audience and the other speakers will respect and support your decision.
4. Because of the limited time available, the conference assumes no formal discussion to follow presentations. However, Chairs of each session are free to organize their sessions as refereed ones, i.e. sessions where papers are assigned a discussant. In this case, Session chairs are asked to please get in touch as soon as possible with the Authors of the papers of their sessions to verify their availability to have a discussant assigned to their papers.
5. The discussant, if any, should provide a 3-minute discussion of the paper's main merits and limitations, possibly suggesting ways to address them for future reference.
6. In case the session is refereed, please adjust presentation times accordingly so as to leave room for all presenters and related discussants.

## Zoom Requirements

For the meeting this year, the 2021 RSAI World Congress will restrict meeting participants to logged-in users only. This means that you must be logged in to Zoom to attend any of the sessions.

If you do not have a Zoom account, you will not be able to join the meeting.

If you try to join a session and are not logged into Zoom, you will receive the following messages:

Click on the **Sign In to Join** button. If you already have an account, log in to Zoom. If you do not have an account, you may sign up at this time.

Having a Zoom account allows you to create your own Instant Meetings or Schedule Meetings. An account also allows you to access your personal settings, where you can update your profile or upgrade your plan at any time.

### How do I sign up for Zoom?

You can sign up for a free Zoom account at [zoom.us/signup](https://zoom.us/signup).

### How much does Zoom cost?

A basic Zoom license is free.

## Issues with logging in?

For any issue when logging in, you may write to the following email addresses, where specialized staff will assist you in the procedure:

## Themes

### Umbrella Theme

#### *Smart Regions – Opportunities for sustainable development in the digital era*

The themes which will zoom in particular on the pressing challenges of meeting the 2030 Agenda of Sustainable Development Goals, in both developed and developing economies. As a new challenge to regional science research is caused by the emerging digital technologies and their implications for analysis, monitoring, evaluation and forecasting of spatial dynamics at all levels, the theme chosen for the congress is ‘Smart Regions- Opportunities for Sustainable Development in the Digital Era’. Therefore, the potential of spatial and temporal big data, machine learning, artificial intelligence, social media information, and of the new spatial maps emerging from digitization and robotization will be addressed by the congress as well, as these forces will have far-reaching impacts on human behaviour and interaction in space.

### General Themes

RS01 - Entrepreneurship  
 RS02 - Infrastructure, transportation and accessibility  
 RS03 - Knowledge and innovation  
 RS04 - Local finance  
 RS05 - Location theory and applications  
 RS06 - Methods in Regional Science and Urban Economics  
 RS07 - Migration and regional labor markets  
 RS08 - Real estate and housing  
 RS09 - Regional and urban policy  
 RS10 - Regional development  
 RS11 - Rural development  
 RS12 - Spatial implications of climate and environmental change

RS13 - Spatial planning  
 RS14 - The spatial dimension of sustainable development  
 RS15 - Theoretical and empirical urban economics  
 RS16 - Tourism  
 RS17 - Globalization and territorial intelligence  
 RS18 - Resilience and Risk Management  
 RS19 - Green economy and complexity of socio-ecosystems  
 RS20 - Biodiversity, ecosystems and ecosystem services  
 RS21 - Agriculture, fisheries and food security  
 RS22 - Nexus: water, agriculture and energy

### Special Sessions’ Themes

SS01 - Alternatives for integrating development with infrastructure provision in the global South  
 Manisha Jain and Jörg Knieling  
 SS08 - Subjective well-being and spatial inequalities  
 Camilla Lenzi and Giovanni Perucca  
 SS09 - Regional, national and supranational identities: determinants and policy implications  
 Enrique López Bazo and Giovanni Perucca  
 SS10 - Regions and cities at the edge of the new technological era  
 Roberta Capello and Camilla Lenzi  
 SS12 - SMEs/Family Businesses and Regional Development  
 Lech Suwala, Rodrigo Basco and Stefano Amato  
 SS16 - Smart, sustainable, resilient regions: Responses to pandemic challenges - Contributions of the Romanian Scholars  
 Daniela L. Constantin and Cristina Serbanica  
 SS17 - Data science, machine learning and big data for regional Sciences

Jean-Claude Thill, Hicham Mharzi Alaoui, Said Lahssini and Hicham Hajji  
 SS18 - Urban Future in the Global South  
 Abdul Shaban and Tomaz Ponce Dentinho  
 SS19 - The spatial dimension of energy transition policies, practices and technologies  
 Andrea Caragliu and Marcello Graziano  
 SS22 - Regional Disparities in the EU and Hungary in the Age of Digitalization and the Pandemic  
 Zoltán Gál  
 SS23 - Understanding the role of Renewable Energy in the Water, Agriculture, Energy Nexus in West and North Africa  
 Mariama Camara and Mary Thompson-Hall  
 SS24 - Education inequality and Economic development: a regional perspective  
 Amaghous Jabrane and Ibourk Aomar  
 SS27 - Discontent, Hate & Intolerant Attitudes  
 Alessandra Michelangeli, Alessandra Faggian and Daria Denti  
 SS28 - Smart Actors for Smart Regions  
 Chiara Tagliaro and Gianandrea Ciaramella.

# PROGRAM | 13<sup>th</sup> World Congress of the RSAI

SS29 - Strengthening the resilience of socio-ecological systems

Sumana Bandyopadhyay, Lakshmi Sivamakrishnan, Tomas Ponce Dentinho and Said Lahssini

SS31 - Regional Economic Development in Asia  
Yuri Mansury and Budy Resosudarmo

SS33 - Plastic pollution and its environmental impact

Abdellatif Khattabi and Diane Pruneau

SS36 - Glocalization and Regional Development

Hideki Fukui and Shinya Ishizaka

SS38 - Resilience and peripheral areas: development patterns and policies in the borderlines

Karima Kourtit, Gabriela Carmen Pascariu, Ramona Tiganasu and Loredana Maria Simionov

SS40 - The productivity gap and the re-launch of productivity in Europe

Roberta Capello and Silvia Cerisola

SS41 - Regional perspective of the different global crisis for small countries in 21 century – case study of Croatia

Vinko Mustra

SS42 - Regional and urban resilience in a turbulent world: perspectives from Aotearoa New Zealand

Philip Morrison and Jacques Poot

SS43 - Advances in Regional Science: Contributions of Italian Scholars

Roberta Capello

SS44 - Mapping Co-Working Spaces: Spatial Patterns and Location Factors

Tüzün Baycan, Grzegorz Micek and Anastasia Sinitsyna

SS45 - Selected regional science topics in Mexico

Serena Eréndira Serrano Oswald

SS46 - Poverty and Local Economy Development in Ecuador

Fabian Vilema

SS47 - Regional Development in Sub-Saharan Africa

Tomaz Ponce Dentinho

SS48A - Arctic regions: economic, climate and epidemiologic challenges

Alexander Pilyasov

SS48B – Regional Science in Russia

Alexander Pilyasov

SS49 - Sharing Economy and Urban Sustainability in Thailand

Sutee Anantsuksomsri and Nij Tontisirin

SS51 - Sustainable Regional Development in China

Ling Xue and Jian Wang

SS52 - Regional Science in Lebanon

Nadim Farajalla and Lina Maddah Souheil

SS53 - Regional Science in Egypt

Michael L. Lahr

SS54 - Regional Science in Paraguay

Eduardo A. Haddad

SS55 - Regional Science in Angola

*The Regional Science Academy*

#### Aims and Scope of ABC

We live in the 'urban century'. Cities all over the world – in both developing and developed countries – display complex evolutionary patterns. A recently published study, *Urban Empires*, charts the backgrounds, mechanisms, drivers, and consequences of these radical changes in our contemporary systems from a global perspective and analyses the dominant position of modern cities in the 'New Urban World'.

In this session, various contributors of the above mentioned publication will present and discuss the drastic change cities have undergone internationally from a broad perspective, and consider their emerging roles in our global network society. Contributions from renowned scholars provide advanced analytical contributions, the spatial scaling applied and theoretical perspectives on the competitive profile of urban agglomerations in a globalizing world. The works that will be presented trace and investigate the economic and political drivers of network cities in a global context, and explores the unprecedented challenges over governance that are presented by mega-cities. These also identify and map out the new geography of the emergent 'urban century'.

With contributions from well-known and influential scholars from around the world, *Urban Empires* session serves as a touchstone for students and researchers keen to explore the scientific and policy needs of cities, as they become our age's global power centers.

## Special Academic Session (SAS)

07:55 -17:15 GMT+1, Wednesday, May 26, 2021

**Do we need new data, models and planning for the post-pandemic city?**

**Room: Dakhla**

<https://us02web.zoom.us/j/88500705804>

**Organizers:** Peter Batey, Guney Celbis, Kingsley Haynes, Karima Kourtit, Peter Nijkamp And Neil Reid

***The Regional Science Academy***

### **Aim & Scope**

The past decade saw the emergence of connected intelligent infrastructures used for facing growing urbanization challenges. These networks of integrated computerized systems began collecting and transmitting urban data in real time, leading to automated and/or supervised interventions aimed to facilitate the lives of the individuals in cities. As part of the general concept of a “Smart City,” real-time data management and analysis has been used to streamline the distribution of energy, waste management, management of traffic congestion, and environmental protection among many other examples. One major purpose of the fast and efficient collection and analysis of city data is to anticipate urban challenges and intervene preemptively.

As the world was just entering a new stage characterized by urban communication networks powered by the Internet of Things infrastructures, the Covid-19 pandemic broke out. Monitoring population density to assess transmission risks and the place-based management of health services based on spatial information on COVID-19 cases have emerged as essential policy-relevant measures. The collection and rapid analysis of data related to the spatial accessibility to health services became an essential task for organizing the effective allocation of healthcare resources. Retuning intelligent transportation systems and developing heat maps identifying hotspots of are already recognized as imperative. This being said, privacy concerns and accessibility to data are vibrant discussion topics alongside with the technical aspects of the collection and processing of information.

What will be the aspects of the new types of data that we need with regards to the new urban life characterized by the pandemic? How will the lasting effects of the pandemic on urban life be represented and tracked digitally? How will this new data be translated into planning the post-pandemic city? This TRSA session will initiate a scientific discussion on how urban data will shape our lives after the pandemic.
